

Prevention of hypothermia in the delivery room for preterm infants <30 weeks gestation

ACTRN12608000212358

Status RECRUITING
Sponsor The Townsville Hospital
Enrollment 80 participants

Plain Language Summary

This study is testing whether wrapping premature babies born before 30 weeks of pregnancy in a thin plastic film immediately after birth can prevent them from getting dangerously cold (hypothermia) during resuscitation in the delivery room. Keeping these tiny babies warm is critical for their survival and reducing health complications.

You may be eligible if:

- Your baby is born premature (before 30 weeks of pregnancy)

You may NOT be eligible if:

- There are no specific exclusion criteria for this study

Talk to your doctor about whether this trial might be right for you.

Key Eligibility Criteria

Inclusion (1)

- Neonatal population from birth

Exclusion (1)

- None

Locations (1 total)

Australia
