

A qualitative exploration of Australian podiatrists' perspectives on Complementary and Alternative Medicine.

ACTRN12613000644763

Status RECRUITING
Sponsor Andrew Knox
Enrollment 15 participants

Plain Language Summary

This study is gathering information about what podiatrists in Australia think about complementary and alternative medicine (CAM) — things like acupuncture, herbal remedies, or massage — and whether these approaches should be part of podiatric care or training. This is a qualitative study using interviews or surveys, and no medical treatment is given.

You may be eligible if:

- You are currently working as a practising podiatrist in Australia

You may NOT be eligible if:

- You are retired or no longer practising as a podiatrist
- You practice outside of Australia

Talk to your doctor about whether this trial might be right for you.

Key Eligibility Criteria

Inclusion (1)

- Anyone currently practising as a podiatrist in Australia.

Exclusion (1)

- Retired or podiatrists not currently practising in Australia.
