

A prospective assessment of patient outcomes following joint replacement surgery

ACTRN12618000317291

Status	RECRUITING
Sponsor	A/Prof John Ireland
Enrollment	3,000 participants

Plain Language Summary

This is an ongoing patient outcomes registry study for people who are having hip or knee joint replacement surgery at a specific surgical practice in Sydney. The study collects detailed information before and after surgery — including pain, function, quality of life, and X-rays — to track how patients recover and to improve surgical care over time. Results are also integrated with the Australian National Joint Replacement Registry. Participation runs for up to 5 years after surgery.

You may be eligible if:

- You are 18 years or older
- You have been diagnosed with hip or knee joint disease and are scheduled for a total hip replacement, total knee replacement, or partial knee replacement
- You are being treated by the primary investigator/orthopaedic consultant at Sydney Bone and Joint Clinic
- You are willing to be part of the clinical research registry

You may NOT be eligible if:

- You have a clinically diagnosed mental or neurological condition that prevents you from completing feedback questionnaires (e.g. schizophrenia, dementia, Alzheimer's disease)
- You withdraw consent for research use of your personal data

Talk to your doctor about whether this trial might be right for you.

Key Eligibility Criteria

Inclusion (3)

- Diagnosed with orthopaedic Hip or Knee pathology and booked for THR, TKR or UKR.
- Undergoing treatment by primary investigator/orthopaedic consultant surgeon.
- Consenting to being part of the Clinical Research Registry which is within the Sydney Bone and Joint Clinic

Exclusion (2)

- Patient-reported outcomes: Clinically diagnosed mental/neurological illness (indicated on GP referral, or identified through secondary referral to psychiatric/neurological specialist) that precludes retrieval of patient feedback via interview, paper or electronic questionnaire (e.g., schizophrenia, dementia, Alzheimer's Disease, personality disorder).
- Revocation of consent for research use of personal data.

Locations (2 total)

Wollongong Hospital - Wollongong, NSW, Australia
Campbelltown Private Hospital - Campbelltown, NSW, Australia
