

Recruitment and Apheresis Collection of Peripheral Blood Hematopoietic Stem Cells, Mononuclear Cells and Granulocytes

NCT00001405

Status RECRUITING
Sponsor National Institute of Allergy and Infectious Diseases (NIAID)
Enrollment 850 participants

Key Eligibility Criteria

Inclusion (34)

- ELIGIBILITY CRITERIA:
- Patients (Patients with a genetically defined PID or other blood disorder or clinical history consistent with PID or other blood disorder)
- Patients will have a genetically defined PID or have a clinical history of recurrent infections or other problems suggestive of PID or other blood disorder, must be 18-70 years of age,
- Some patients may have active bacterial or fungal infection at the time of study entry.
- Preserved renal function (creatinine less than or equal to 2.5 mg/dL; less than or equal to 3+ proteinuria); preserved hepatic function (bilirubin less than or equal to 2.0 mg/dl); preserved hematologic function (WBC greater than or equal to 1000/mm³; granulocytes greater than or equal to 500/mm³; platelets greater than or equal to 100,000; hematocrit greater than or equal to 25). Of note, patients with PID often have associated chronic thrombocytopenia. Patients with stable chronic thrombocytopenia will be eligible for collection, at the investigator's discretion, with the caveat that patients with platelet count <40,000 the day prior to collection will be transfused with platelets on the morning of collection. Platelets may also be given to these patients following the collection if medically indicated..
