

Study of Mycobacterial Infections

NCT00018044

Status	RECRUITING
Sponsor	National Institute of Allergy and Infectious Diseases (NIAID)
Enrollment	1,000 participants

Key Eligibility Criteria

Inclusion (7)

- This protocol will study patients with mycobacterial infections, including those without previously identified predisposing disease processes as well as individuals with underlying malignancies.
- Patients with nontuberculous mycobacterial infections will be of particular interest, as we are interested in isolating and characterizing the primary immune defect(s) responsible for this infection susceptibility.
- Select patients with acquired immunodeficiencies or tuberculosis may also be studied if relevant host defects are suspected.
- Patients must be referred to NIH with a diagnosis or suspicion of having mycobacterial infection.
- Male and female patients will be accepted without limitations due to age.

... and 2 more (see full listing online)

Exclusion (1)

- None.

Locations (1 total)

National Institutes of Health Clinical Center, Bethesda, Maryland, United States
