

# Study of Factors Regulating Mast Cell Proliferation

NCT00044122

---

<b>Status</b>	RECRUITING
<b>Sponsor</b>	National Institute of Allergy and Infectious Diseases (NIAID)
<b>Enrollment</b>	600 participants

## Key Eligibility Criteria

---

### Inclusion (9)

- Participants with mastocytosis zero to 80 years of age may participate in telehealth visits, and two to 80 years of age may participate on-site at NIH Clinical Center.
  - Histologic evidence of increased mast cell number by bone marrow and/or skin biopsy or documentation of mastocytosis in the skin
  - supported with a photograph of diagnostic skin lesions
  - Must be under the care of a primary care physician to be enrolled.
  - Ability to provide informed consent.
- ... and 4 more (see full listing online)

### Exclusion (3)

- Anemia with hemoglobin less than 8 g/dL, hematocrit less than 24.
- Any condition that in the opinion of the investigator contraindicates participation in this study.
- Any condition that in the opinion of the investigator contraindicates participation in this study.
