

A Prospective Database of Infants With Cholestasis

NCT00061828

Status	RECRUITING
Sponsor	Arbor Research Collaborative for Health
Enrollment	1,000 participants

Key Eligibility Criteria

Inclusion (3)

- Infant's age less than or equal to 180 days at initial presentation at the ChiLDReN clinical site.
- Diagnosis of cholestasis defined by serum direct or conjugated bilirubin greater than or equal to 2 mg/dl and suspected biliary atresia.
- The subject's parent(s)/guardian(s) willing to provide informed written consent.

Exclusion (9)

- Acute liver failure.
- Previous hepatobiliary surgery with dissection or excision of biliary tissue.
- Diagnoses of bacterial or fungal sepsis (except where associated with metabolic liver disease)
- Diagnoses of hypoxia, shock or ischemic hepatopathy within the past two weeks (If the cholestasis persists beyond two weeks of the initiating event, the infant can be enrolled).
- Diagnosis of any malignancy.

... and 4 more (see full listing online)
