

Study of Lung Proteins in Patients With Pneumonia

NCT00077909

Status	RECRUITING
Sponsor	National Institutes of Health Clinical Center (CC)
Enrollment	750 participants

Key Eligibility Criteria

Inclusion (2)

- All eligible patients undergoing diagnostic bronchoscopy who provide consent for proteomic analysis of BAL fluid supernatant and chart review of patient characteristics will be included in this study.
- A parent/guardian may provide consent for a child age 17 or under and a Legally Authorized Representative (LAR) may provide consent for adults unable to consent.

Exclusion (1)

- Patients undergoing bronchoscopy but not wanting to participate with either the chart review or the proteomic analysis of BAL fluid supernatant will be excluded.

Locations (1 total)
