

Development of Magnetic Resonance Spectroscopic Imaging Techniques for Imaging Metabolites in Human Brain and Muscle

NCT01266577

Status	RECRUITING
Phase	Not Applicable
Sponsor	National Institute of Mental Health (NIMH)
Enrollment	300 participants

Key Eligibility Criteria

Inclusion (4)

- years of age
- able to give written informed consent
- healthy based on medical history and physical exam
- enrolled in Protocol 01-M-0254 or Protocol 17-M-0181

Exclusion (9)

- Any current Axis 1 diagnosis
- Clinically significant laboratory abnormalities
- Positive HIV test
- Metallic foreign bodies that would be affected by the magnetic resonance imaging (MRI) magnet, or fear of enclosed spaces likely to make the subject unable to undergo an MRI scan.
- History of neurological illness or injury with the potential to affect study data interpretation, such as multiple sclerosis, Parkinson's disease, seizure disorder or traumatic brain injury
- ... and 4 more (see full listing online)
