

Protocol for Collecting, Banking and Distributing Human Tissue Samples: St. Jude Children's Research Hospital Tissue Resources Core Facility

NCT01354002

Status	RECRUITING
Sponsor	St. Jude Children's Research Hospital
Enrollment	100,000 participants

Key Eligibility Criteria

Inclusion (3)

- Patients (and their relatives) and control populations treated or studied at SJCRH and SJCRH affiliates and collaborating sites that have IRB approval for TBANK with malignant and non-malignant conditions.
- Patients from institutions that do not have Institutional Review Board (IRB) approval for TBANK, and at which a banking mechanism may not be established, who provide samples for research at St. Jude and from whom consent for TBANK is obtained by the TBANK principal investigator (PI).
- Samples from employees of St. Jude Children's Research Hospital (SJCRH) collected for public health surveillance studies (e.g. SJTRC-NCT04362995) provided the employees have consented to participate in the specific IRB-approved studies.

Exclusion (1)

- Patients from institutions that do not have IRB approval for TBANK, and who have not provided consent for TBANK, or patients not enrolled on SJCRH protocols that incorporate consent for tumor banking.
