

Natural History of Individuals With Immune System Problems That Lead to Fungal Infections

NCT01386437

Status RECRUITING
Sponsor National Institute of Allergy and Infectious Diseases (NIAID)
Enrollment 1,200 participants

Key Eligibility Criteria

Inclusion (27)

- Patients:
 - Adults or children (regardless of age, sex, or ethnicity/race) with a known or yet uncharacterized inherited immunodeficiency and a definitively diagnosed mucocutaneous or invasive fungal infection.
 - OR
 - Adults or children (regardless of age, sex, or ethnicity/race) with acquired immunodeficiency and a severe, unusual, persistent or treatment-refractory chronic mucocutaneous fungal infection.
 - OR
- ... and 22 more (see full listing online)

Exclusion (16)

- Patients:
 - A patient will not be eligible if he/she has any of the following:
 - Any condition which, in the investigator's opinion, may interfere with the evaluation of a co-existing abnormality of immunity that is the subject of study under this protocol.
 - Any condition which, in the investigator's opinion, places the patient at undue risk by participating in the study.
 - Unwillingness to undergo testing or procedures associated with this protocol.
- ... and 11 more (see full listing online)
