

Clinical and Genetic Studies of Li-Fraumeni Syndrome

NCT01443468

Status	RECRUITING
Sponsor	National Cancer Institute (NCI)
Enrollment	5,000 participants

Key Eligibility Criteria

Inclusion (31)

- On referral, persons of all ages will be considered for inclusion in the study
- because of either:
 - A family or personal medical history of neoplasia consistent with the diagnosis of LFS or LFL; or,
 - A personal history of a germline TP53 mutation; or,
 - A first- or second- degree relative of a TP53 mutation carrier, regardless of mutation status; or,
- ... and 26 more (see full listing online)

Exclusion (3)

- Referred individuals and families whose reported diagnoses cannot be verified
- Medical or psychiatric disorder which, in the opinion of the Principal Investigator, would preclude the ability to participate in clinical research
- Women who are pregnant will not be eligible for the cancer screening protocol until they recover post-partum. Women participating in the cancer screening protocol will discontinue this component if they become pregnant while on study. Once they recover post-partum, they can continue the cancer screening protocol.
