

# Evaluating New Radiation Techniques for Cardiovascular Imaging

NCT01621594

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	National Heart, Lung, and Blood Institute (NHLBI)
<b>Enrollment</b>	5,000 participants

## Key Eligibility Criteria

---

### Inclusion (4)

- Clinical indication for a coronary CT angiography exam
- Age equal to or greater than 18 years
- Able to understand and willing to sign the Informed Consent Form
- Able and willing to provide follow-up information

### Exclusion (3)

- Pregnancy
- If receiving intravenous contrast, severe renal excretory dysfunction, estimated glomerular filtration rate  $\leq 30$  mL/min/1.73m<sup>2</sup> body surface area according to the Modification of Diet in Renal Disease criteria or as reported by the clinical lab. Glomerular filtration rate will be estimated using the 2021 CK-EPI equation that eliminate the use of race coefficient as reported in CRIS.
- Screen Failures: Subjects who are screen failures can be re-enrolled once they meet eligibility criteria. Rescreened participants will be assigned the same participant number as for the initial screening.

## Locations (1 total)
