

MRI-Guided Cryoablation to Alleviate Pain in Head, Neck and Spine

NCT01788410

Status RECRUITING
Sponsor Brigham and Women's Hospital
Enrollment 50 participants

Key Eligibility Criteria

Inclusion (6)

- Participants must be willing and able to sign a written informed consent document.
 - Patients must have facet joint disease or pain due to a damaged or compressed nerve that would benefit from a minimally invasive image-guided procedure (i.e., adjacent to critical structures, better visualized under 3 Tesla MRI than CT)
 - Subjects must be able to adhere to the visit schedules and attend pre and post imaging.
 - Participants must be at least 18 years of age
 - Participants must have an estimated life expectancy of >8 weeks in the opinion of the clinician.
- ... and 1 more (see full listing online)

Exclusion (2)

- Contraindications to MRI and Gadolinium- (i.e. estimated Glomerular Filtration Rate <60 ml/min, metal clips)
- Pregnant or breastfeeding woman are excluded from this research.
