

Characterization Imaging Instruments in Alcoholics and Non-Alcoholics

NCT02108080

Status RECRUITING
Sponsor National Institute on Alcohol Abuse and Alcoholism (NIAAA)
Enrollment 1,000 participants

Key Eligibility Criteria

Inclusion (4)

- All adult participants must be:
- Age 18 years or older,
- Have been pre-screened, determined eligible for any NIAAA study, or enrolled in any
- NIAAA study (including 14-AA-0181).

Exclusion (13)

- As this is a natural history protocol, there are no exclusionary criteria for this study.
- Participants should have been tested negative prior to the time of consent and study procedures using an alcohol breathalyzer, urine drug (UDT) and, when applicable, pregnancy tests. Individuals with a positive breath alcohol concentration (BrAC), UDT, or pregnancy test will be re-scheduled or withdrawn from the study.
- Positive BrAC#,
- Positive urine drug test (UDT) # for benzodiazepines, cocaine, methamphetamines, and opiates for outpatients. Positive UDT for benzodiazepines is not exclusionary for the inpatients. It is common that the inpatients who are treated for AUD withdrawal are treated with benzodiazepines. Positive THC would also not be exclusionary for this study since it tends to be detected over the long period of time after use. However, we will make note of these for the data analysis purposes.
- Task performance (behavioral, fMRI) only: cleared based on neuromotor examination,
... and 8 more (see full listing online)
