

# Treating Primary Sclerosing Cholangitis and Biliary Atresia With Vancomycin

NCT02137668

---

|                   |                                       |
|-------------------|---------------------------------------|
| <b>Status</b>     | RECRUITING                            |
| <b>Phase</b>      | Phase 1                               |
| <b>Sponsor</b>    | Sacramento Pediatric Gastroenterology |
| <b>Enrollment</b> | 200 participants                      |

## Key Eligibility Criteria

---

### Inclusion (2)

- Persons who have primary sclerosing cholangitis, biliary atresia, a chronic intestinal disorder or who are undergoing upper or lower endoscopy.
- Persons who have primary sclerosing cholangitis or biliary atresia who are good candidates for vancomycin therapy.

### Exclusion (2)

- Patients that have taken antibiotics and/or immunomodulators within the last 3 months will be excluded as this will alter the original bacterial flora.
- Females who are pregnant may not participate.

## Locations (1 total)
