

# Pathogenesis and Genetics of Disseminated or Refractory Coccidioidomycosis

NCT02190266

---

**Status** RECRUITING  
**Sponsor** National Institute of Allergy and Infectious Diseases (NIAID)  
**Enrollment** 400 participants

## Key Eligibility Criteria

---

### Inclusion (8)

- To be eligible for this study, potential participants must meet the following criteria:
- Age greater than or equal to 2 years old.
- a. Enrollment of pediatric patients who are acutely ill or likely to become acutely ill will be deferred until a time when they are considered medically stable by the PI.
- Have a positive *Coccidioides* antigen load or culture proven (a) refractory pulmonary coccidioidomycosis or (b) disseminated coccidioidomycosis.
- Refractory pulmonary coccidioidomycosis must have occurred for at least 6 months and includes progressive pulmonary involvement without significant pulmonary cavitation.
- ... and 3 more (see full listing online)

### Exclusion (3)

- HIV infection
- Currently taking more than 20 mg/day of prednisone or undergoing active immunosuppressive therapy in the opinion of the investigator
- Any medical, psychiatric, social condition, occupational reason or other responsibility that, in the judgment of the investigator, is a contraindication to protocol participation or impairs a volunteer's ability to give informed consent.
