

Inflammatory and Infectious Diseases of the Nervous System

NCT02435810

Status	RECRUITING
Sponsor	National Institute of Neurological Disorders and Stroke (NINDS)
Enrollment	1,000 participants

Key Eligibility Criteria

Inclusion (26)

- At the time of enrollment, participants will:
 - Have a known or suspected infection or inflammation of the nervous system or post infection sequelae based on clinical or imaging data provided by the referral facility. For the purpose of this study, neuroinfectious disease or neuroinflammation is defined as any of the following:
 - fever with nervous system signs or symptoms (excluding delirium)
 - any neurological symptoms accompanied by cerebrospinal fluid (CSF) with evidence of inflammation (which may include pleocytosis, hypoglycorrachia, elevated protein, or other evidence of intrathecal immune activation including IgG index or presence of oligoclonal bands)
 - systemic infection or inflammatory disease with neurological involvement
- ... and 21 more (see full listing online)

Exclusion (7)

- At the time of enrollment, participants will:
 - Not have a clinically significant medical condition that, in the best judgment of the investigators, may expose the patient to undue risk of harm or prevent the patient from completing the study (examples include, but are not limited to, ischemic cardiomyopathy, clotting disorder, brittle diabetes)
 - Not have an acute or unstable medical condition that, in the best judgement of the investigator, would be difficult to handle at the NIH Clinical Center
 - Not have a clearly-established diagnosis of well-characterized disease entity with validated treatment algorithms for which proposed resource investment, in the opinion of the investigators, would not contribute to further advancement of knowledge
- At the time of enrollment, participants will not have:
- ... and 2 more (see full listing online)
