

# Screening of Healthy Volunteers for Investigational Antimalarial Drugs, Malaria Vaccines, and Controlled Human Malaria Challenge

NCT02639299

---

Status	RECRUITING
Sponsor	National Institute of Allergy and Infectious Diseases (NIAID)
Enrollment	1,500 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- All of the following criteria must be fulfilled for a subject to participate in this trial:
- Age  $\geq 18$  and  $\leq 50$  years.
- In good general health and without clinically significant medical history
- Reliable access to the clinical trial center and available in the area for more than 1 year
- Females of childbearing potential must be willing to undergo periodic pregnancy testing and use reliable contraception per protocol when enrolled into LMIV clinical trials (protocol-specific requirements)

### Exclusion (31)

- A subject will be excluded from participating in this trial if any one of the following criteria is fulfilled:
- Pregnant, breastfeeding, or planned pregnancy in the upcoming year.
- Hemoglobin, white blood cell (WBC), platelets, alanine transaminase (ALT), and creatinine (Cr) outside of local lab normal range (subjects may be included at the investigator's discretion for "not clinically significant" values outside of normal range).
- Anticipated use during the study period, or use within the following periods prior to enrollment:
- Investigational malaria vaccine within the last five years
- ... and 26 more (see full listing online)

## Locations (1 total)
