

Natural History of Craniofacial Anomalies and Developmental Growth Variants

NCT02639312

Status	RECRUITING
Sponsor	National Institute of Dental and Craniofacial Research (NIDCR)
Enrollment	2,400 participants

Key Eligibility Criteria

Inclusion (13)

- For Subjects:
 - Age ≥ 2 to < 100 with craniofacial anomalies/abnormalities. Affected family member (defined as an individual with a demonstrable relationship, any family relationship no matter how distant, with the above subject in the pedigree) who expresses craniofacial anomalies will be classified as a subject.
 - Able to provide consent, or in the case of minors, have a legally authorized representative to provide consent.
 - For Unaffected Family Members:
 - These family members are defined as individuals with a demonstrable relationship (any family relationship, no matter how distant) with a proband subject by pedigree who do not express craniofacial anomalies.
- ... and 8 more (see full listing online)

Exclusion (6)

- An individual who meets any of the following criteria will be excluded from participation in this study:
 - For All Participants:
 - A history of facial trauma requiring surgical treatment and facial reconstruction.
 - Refusal for both genetic testing and CBCT imaging. Participants must agree to at least one of the two (one or the other is required to participate).
 - For Healthy Volunteers:
- ... and 1 more (see full listing online)
