

# Clinical Transcriptomics in Systemic Vasculitis (CUTIS)

NCT03004326

---

**Status** RECRUITING  
**Sponsor** Peter Merkel  
**Enrollment** 50 participants

## Key Eligibility Criteria

---

### Inclusion (12)

- Have a cutaneous lesion (purpuric macules, palpable purpura, retiform purpura, nodules, ulcers, or urticarial) believed to be related to active vasculitis
  - Have a suspected or confirmed diagnosis of:
    - Cryoglobulinemic vasculitis (CV)
    - Drug-induced vasculitis
    - Eosinophilic granulomatosis with polyangiitis (EGPA)
- ... and 7 more (see full listing online)

### Exclusion (7)

- You are less than five years old
  - Considered not to be a candidate for a biopsy or have a higher risk of developing an infection, bleeding, etc., from the biopsy, or a doctor believes that the risks for you participating in this study do not outweigh the potential benefit of learning information from your biopsy
  - You have a neutrophil count (type of white blood cell) less than 1500/mm<sup>3</sup>, platelet count less than 50,000/mm<sup>3</sup>, or a hemoglobin less than 7 g/dL
  - You have an uncontrolled disease that could prevent you from completing the study procedures
  - You have an active infection at or near the potential biopsy site, have poor circulation, or have bony prominence or other structure that would increase your risk of complications if you participated in this study
- ... and 2 more (see full listing online)

## Locations (10 total)

---

University of California, Los Angeles, Los Angeles, California, United States  
Boston University School of Medicine, Boston, Massachusetts, United States  
Mayo Clinic, Rochester, Minnesota, United States  
... and 7 more locations
