

Comprehensive Data Collection and Follow-Up for Patients With Thyroid, Parathyroid and Adrenal Disease

NCT03050762

Status RECRUITING
Sponsor M.D. Anderson Cancer Center
Enrollment 15,000 participants

Key Eligibility Criteria

Inclusion (2)

- All patients that are being seen at MD Anderson with diagnosed or suspected endocrine disease. Patients will be selected from patients undergoing evaluation and/or treatment in the Endocrine Center, either by selection from a participating Endocrine physician or by screening from study personnel for patients scheduled to be seen in the Endocrine Clinic.
- In addition, we intend to contact family members of patients who are enrolled on the study, and found to be deceased at follow-up, to request permission to obtain cause of death, to determine whether cause of death may be related to endocrine disease.

Exclusion (1)

- N/A

Locations (1 total)

University of Texas MD Anderson Cancer Center, Houston, Texas, United States
