

Transcatheter Mitral Valve Replacement With the Medtronic Intrepid™ TMVR System in Patients With Severe Symptomatic Mitral Regurgitation.

NCT03242642

Status	RECRUITING
Phase	Not Applicable
Sponsor	Medtronic Cardiovascular
Enrollment	1,056 participants

Key Eligibility Criteria

Inclusion (2)

- Moderate to severe or severe symptomatic mitral regurgitation
- Local site multidisciplinary heart team experienced in mitral valve therapies agrees that the subject is unsuitable for treatment with approved transcatheter repair or conventional mitral valve intervention

Exclusion (6)

- prior transcatheter mitral valve procedure with device currently implanted
- anatomic contraindications
- prohibitive mitral annular calcification
- left ventricular ejection fraction $\leq 25\%$
- need for emergent or urgent surgery
- ... and 1 more (see full listing online)
