

# Clinical Monitoring Strategy Versus Electrophysiology-guided Algorithmic Approach With a New LBBB After TAVI

NCT03303612

---

|            |                          |
|------------|--------------------------|
| Status     | RECRUITING               |
| Phase      | Not Applicable           |
| Sponsor    | Montreal Heart Institute |
| Enrollment | 250 participants         |

## Key Eligibility Criteria

---

### Inclusion (3)

- Age ≥18 years
- Informed consent to participate
- Persistent new-onset LBBB after TAVI implantation (i.e. present at day 2)

### Exclusion (3)

- Prior pacemaker or implantable cardioverter-defibrillator
- Pre-existing right bundle branch block (RBBB) or LBBB (i.e., prior to TAVI)
- Class I or IIA indication for PPM implantation according to management guidelines
