

# Investigations of Juvenile Neuronal Ceroid Lipofuscinosis

NCT03307304

---

<b>Status</b>	RECRUITING
<b>Sponsor</b>	Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD)
<b>Enrollment</b>	300 participants

## Key Eligibility Criteria

---

### Inclusion (20)

- For the Main and Sub-Studies, participants  $\geq$  1 week of age, of all genders, demographics, geographic locations, and disease severity will be recruited in order to obtain cross-sectional representation of CLN3-related conditions (Main and Sub-Studies) or all NCLs (Sub-Study B). Participants in the Main study will be followed at approximately yearly intervals to obtain longitudinal data. Participants in Sub-Study A may elect to send in medical records and samples only, or to come to the NIH for evaluations as outlined in Section 4. We anticipate that
- participants in Sub-Study B will be seen mostly at NCL/CLN3-related family conferences.
- Main Study:
- Individuals  $\geq$  1 week of age with a diagnosis of CLN3 or a CLN3-related/other NCL-type condition. Diagnosis determined by one of the following:
- Two CLN3 or NCL condition-appropriate genetic mutations
- ... and 15 more (see full listing online)

### Exclusion (7)

- Main Study:
- Individuals who cannot travel to the NIH because of their medical condition.
- Individuals who, in the opinion of the Investigator, are unable to comply with the protocol or have medical conditions that would potentially increase the risk of participation.
- Females who are pregnant.
- Sub-Studies A and B:
- ... and 2 more (see full listing online)

## Locations (1 total)
