

Diagnostic Odyssey: Whole Genome Sequencing (WGS)

NCT03458962

Status	RECRUITING
Sponsor	Nicklaus Children's Hospital f/k/a Miami Children's Hospital
Enrollment	1,000 participants

Key Eligibility Criteria

Inclusion (4)

- Symptomatic male or female children ages 0-21 who have an unknown medical condition thought to have an underlying genetic cause after parental consent has been obtained.
- Willingness of referring provider or other qualified medical staff member to participate in this study by facilitating collection of biologic specimens and clinical information.
- Patient whose medical condition can be reasonably attributed to a possible genetic etiology.
- Patient have had at least one diagnostic test without a definite diagnosis.

Exclusion (3)

- Unwillingness to consent to research.
- Affected adults (>21 years of age), unless they are a biological relative of the affected child.
- Any patient whose medical condition cannot be reasonably attributed to a possible genetic etiology or there is a prior diagnosis that explains the child's clinical presentation.
