

# Combination Probiotic: BB-12 With LGG (Different Doses) in Treating Children With Autism Spectrum Disorder

NCT03514784

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Phase 1, Phase 2
<b>Sponsor</b>	The University of Texas Health Science Center, Houston
<b>Enrollment</b>	70 participants

## Key Eligibility Criteria

---

### Inclusion (1)

- Healthy children with autism spectrum disorders (4 - 16 years old) and gastrointestinal symptoms, based on the GI Severity Index, with no other recognized illness will be enrolled in this study. There will be no selection on the basis of age, race, or gender. Although the investigators anticipate the majority of subjects will be male and/or pre-pubertal, in females of childbearing potential, a pregnancy test (urine) will be performed on females participating (at each visit).

### Exclusion (12)

- Pregnancy or breastfeeding
- Subjects taking immunosuppressive medications, including oral corticosteroids
- A History of Positive result of HIV, Hepatitis B, and/or Hepatitis C test
- Abnormal lab test results (Section 5.2)
- Gastrointestinal diseases such as celiac disease, inflammatory bowel disease
- ... and 7 more (see full listing online)
