

Intra-Corporeal Anastomosis Result in Quicker Return of Bowel Function/Earlier Discharge

NCT03862781

Status	RECRUITING
Phase	Not Applicable
Sponsor	Corewell Health West
Enrollment	125 participants

Key Eligibility Criteria

Inclusion (1)

- Eligible patients are those over 18 years of age who are regularly scheduled to undergo a right hemicolectomy via a minimally invasive approach (robotic or laparoscopic) with the creation of an anastomosis. Right colectomy will be defined as removal of the ascending colon, ligation of the ileocolic artery and vein, +/- removal of the terminal ileum, +/- removal of the proximal transverse colon, and +/- removal of the right branch of the middle colic artery and vein.

Exclusion (8)

- Pregnant women
- Additional colon resection is planned (i.e. left colectomy or proctectomy)
- Vulnerable populations such as prisoners or adults unable to give consent
- If the scheduled surgery is planned at Butterworth hospital (as to standardize the nursing care received postoperatively)
- Emergent cases

... and 3 more (see full listing online)
