

# Patient-Centered Assessment of Symptoms and Outcomes

NCT03952624

---

<b>Status</b>	RECRUITING
<b>Sponsor</b>	National Center for Complementary and Integrative Health (NCCIH)
<b>Enrollment</b>	692 participants

## Key Eligibility Criteria

---

### Inclusion (10)

- All Participants (including returning participants)
- Adult participants aged  $\geq$  18 years at the time of enrollment.
- Able to provide written informed consent.
- Willing and able to complete study procedures.
- Fatigued Participants

... and 5 more (see full listing online)

### Exclusion (27)

- Exclusion from study entry:
- Not fluent in English.
- Have medical health issues that create additional and substantial adverse risks related to study procedures. Medical examples are the acute complications of medical disease, such as unstable hypertension, diabetic ketoacidosis, symptomatic hyperthyroidism, and unstable angina.
- Have a psychiatric condition that prevents participant from being able to reliably report the fatigue experience (e.g., a psychotic disorder with severely disorganized thinking);
- Current substance use disorder within the last five years or positive urine toxicology results at enrollment and before Stage 2. Prior marijuana use within the past five years will not be an exclusion.

... and 22 more (see full listing online)
