

Activity Levels in Bone Marrow Transplant Patients

NCT04115241

Status RECRUITING
Sponsor Michael Tomasson
Enrollment 200 participants

Plain Language Summary

This study is measuring how physically active patients are before, during, and after a bone marrow transplant (also called a stem cell transplant). The goal is to understand how activity levels change during this intensive treatment and what effect that has on recovery.

****You may be eligible if...****

- You are a patient scheduled to receive a bone marrow (stem cell) transplant

****You may NOT be eligible if...****

- You are not scheduled to receive a bone marrow transplant

Talk to your doctor to see if this trial is right for you.
