

Sonographic Assessment of Cricoid Pressure

NCT04190524

Status	RECRUITING
Phase	Not Applicable
Sponsor	Boston Children's Hospital
Enrollment	45 participants

Key Eligibility Criteria

Inclusion (2)

- All patients age 0 - 17 years who are on the OR (operating room) schedule and all patients admitted to the MSICU (Medical Surgical Intensive Care Unit) will be screened for this study.
- Patients in the MSICU will only be included if they are sedated as part of their clinical management.

Exclusion (6)

- history of airway or esophageal malformations (e.g. esophageal atresia or trachea-esophageal fistula) or who have had prior surgical procedures involving the airway or esophagus
 - known difficult airways
 - patients with tenuous artificial airways as determined by reviewing the CXR (chest x-ray)
 - patients with abnormal blood flow pattern to the head (e.g. history of right carotid ligation or interruption, known incomplete circle of Willis, known right IJ (internal jugular) venous clots or obstruction)
 - patients with left neck CVLs (Central Venous Line)
- ... and 1 more (see full listing online)
