

OCT in Fuchs' Dystrophy

NCT04258787

Status	RECRUITING
Sponsor	Oregon Health and Science University
Enrollment	60 participants

Key Eligibility Criteria

Inclusion (2)

- Damaged or diseased corneal endothelium from Fuchs' or PBK
- Willingness to commit to required study visits

Exclusion (8)

- Prior Endothelial Keratoplasty (EK) or any other surgery except uncomplicated cataract surgery
- Presence of a condition that increases the probability for treatment failure (e.g., heavily vascularized cornea, uncontrolled uveitis)
- Other primary endothelial dysfunction conditions (e.g., posterior polymorphous corneal dystrophy and congenital hereditary corneal dystrophy, iridocorneal endothelial syndrome)
- Central sub-epithelial or stromal scarring that could impact post-operative clarity assessment
- Peripheral anterior synechiae in the angle greater than 3 clock hours
