

# EAS Familial Hypercholesterolaemia Studies Collaboration

NCT04272697

---

<b>Status</b>	RECRUITING
<b>Sponsor</b>	Imperial College London
<b>Enrollment</b>	75,000 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Clinical and/or genetic diagnosis of heterozygous or homozygous familial hypercholesterolaemia (FH)
- Relatives of index cases without a diagnosis of FH where screening (cascade or other) is carried out.
- The data have been de-identified prior to transferring to the EAS FHSC Global Registry.

### Exclusion (2)

- Secondary causes of dyslipidaemia (e.g. untreated hypothyroidism, cholestasis, nephrotic syndrome).
- Where data collection does not conform to the local or country wide standards for anonymised data.

## Locations (1 total)
