

# Genetic Evolution of Arboviruses in New Caledonia Between 1995 and 2024 and Impact of Wolbachia

NCT04615364

---

**Status** RECRUITING  
**Sponsor** Institut Pasteur  
**Enrollment** 600 participants

## Key Eligibility Criteria

---

### Inclusion (3)

- Appearance of clinical signs suggestive of an infection with an arbovirus in the 7 days preceding the blood sample,
- Diagnostic confirmation by RT-qPCR of mono-infection with dengue virus or another arbovirus.
- Patients or their representative (s) informed of the possible secondary use for research purposes of the samples initially taken for diagnostic purposes and their derivatives, and who have not since expressed their opposition to the secondary use of the samples diagnostics or their derivatives for research,

### Exclusion (3)

- Documented opposition from a patient or his representative (s)
- Previously established viral load too low.
- Sample obtained from a sample taken more than 7 days after the appearance of clinical signs of infection.
