

Validation of Continuous Monitoring of Vital Signs in Children With a Connected Patch

NCT04627766

Status	RECRUITING
Phase	Not Applicable
Sponsor	St. Justine's Hospital
Enrollment	48 participants

Key Eligibility Criteria

Inclusion (2)

- Children (0 to 18 years old) admitted in St. Justine's Hospital's PICU.
- PICU monitoring for the next 24 hours

Exclusion (4)

- Recent cardiac or thoracic surgery
- Thoracic skin lesion that contraindicates the VT-Patch
- No parental consent
- Intermittent presence of one study observer in the patient room is considered inappropriate by the physician or the nurse in charge because of the child's medical condition
