

Multicentre Clinical Study to Evaluate the Effect of Personalized Therapy on Patients With Immunoglobulin A Nephropathy.

NCT04662723

Status	RECRUITING
Phase	Phase 4
Sponsor	Fondazione Sclera
Enrollment	878 participants

Key Eligibility Criteria

Inclusion (2)

- Only adult patients (age 18-70 years) with biopsy-proven idiopathic IgAN.
- IgAN patients with active or chronic or moderate renal lesions

Exclusion (17)

- Patients with idiopathic IgAN and nephrotic syndrome (minimal change disease at kidney biopsy)
- IgAN patients with hematuria and acute renal failure
- IgAN patients with rapidly progressive glomerulonephritis (extracapillary lesions in more than 50% of glomeruli)
- Patients with secondary IgAN (lupus nephritis, Schoenlein-Henoch purpura, liver cirrhosis)
- Any prior immunosuppressive therapy
- ... and 12 more (see full listing online)
