

Intra-arterial Neuroprotective Strategy for Ischemic STroke Patients With Endovascular Therapy (INSIST-ET)

NCT04664933

Status	RECRUITING
Phase	Not Applicable
Sponsor	Hui-Sheng Chen
Enrollment	30 participants

Key Eligibility Criteria

Inclusion (3)

- Age ≥18 years;
- Acute ischemic stroke patients who is eligible for endovascular treatment;
- Signed informed consent.

Exclusion (5)

- Modified Rankin Score ≥2 caused by a history of prior stroke;
- Coagulation disorders, systematic hemorrhagic tendency, thrombocytopenia ($<80000/\text{mm}^3$);
- Severe hepatic or renal dysfunction, increase in ALT or AST (more than 2 times of upper limit of normal value), increase in serum creatinine (more than 1.5 times of upper limit of normal value) or requiring dialysis;
- Severe hypertension (systolic blood pressure over 200mmHg or diastolic blood pressure over 110 mmHg);
- Unsuited for this clinical studies assessed by researcher.
