

# Unraveling the Mechanisms Underlying Primary Sclerosing Cholangitis Through a Multidisciplinary, Integrative Research Approach

NCT04685200

---

**Status** RECRUITING  
**Sponsor** National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK)  
**Enrollment** 143 participants

## Key Eligibility Criteria

---

### Inclusion (9)

- PSC SUBJECTS:
- In order to be eligible to participate in this study, an individual must meet all of the following criteria:
- Stated willingness to comply with all study procedures and availability for the duration of the study
- Male or nonpregnant female, greater than or equal to 18 years of age
- Evidence of PSC established by biochemical testing and either MRCP or ERCP. Participant must have evidence of large duct disease on imaging.

... and 4 more (see full listing online)

### Exclusion (35)

- An individual who meets any of the following criteria will be excluded from participation in this study:
- Pregnant or lactating women or females of child-bearing age not taking measures to prevent pregnancy during the period of study.
- History of clinical, serologic, or histopathologic evidence supporting etiologies of chronic liver disease other than PSC
- History of liver transplantation
- Diagnosis consistent with secondary sclerosing cholangitis (cholelithiasis, bile duct strictures secondary to ischemia, HIV cholangiopathy, etc.).

... and 30 more (see full listing online)
