

# Genetic Variants and Regulation of Specialized Pro-resolving Mediator

NCT04698291

---

**Status** RECRUITING  
**Sponsor** Queen Mary University of London  
**Enrollment** 200 participants

## Key Eligibility Criteria

---

### Inclusion (1)

- Current volunteer of the Genes & Health program with (test) or without (control) relevant genetic mutations. Genes & Health is a huge long-term study of 100,000 people of Bangladeshi and Pakistani origin focuses to link genes with health records and to study disease and treatments. When a volunteer participates in this program, they agree to the possibility to be invited for further studies. Gene & Health program invites volunteers to take part in two regions of the UK: East London and Bradford.

### Exclusion (6)

- Volunteer that has not had their genome sequenced after taking part in Stage 1 of Genes & Health program.
  - Volunteer with significant genetically inherited conditions.
  - Any abnormality or pre-existing disease which, in the opinion of the investigator, might either expose the subject to risk, or influence the validity of the results.
  - Volunteer that went under surgery and are recovering.
  - Participation in a clinical study of a new chemical entity, biological product or a prescription medicine, or loss of more than 400 mL blood, within the previous 3 months.
- ... and 1 more (see full listing online)
