

# HIP Fracture Accelerated Surgical Treatment And Care track 2 Trial

NCT04743765

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	Population Health Research Institute
<b>Enrollment</b>	1,100 participants

## Key Eligibility Criteria

---

### Inclusion (4)

- age ≥45 years;
- diagnosis of hip fracture during working hours with a low-energy mechanism requiring surgery;
- troponin elevation ( at least one troponin measurement above the upper limit of normal occurring from the time of hip fracture to the time of randomization); and
- informed consent.

### Exclusion (7)

- taking a therapeutic dose of an anticoagulant for which no reversing agent is available and the anesthesiologist or surgeon believe surgery within 6 hours of eligibility criteria met would not be safe;
  - patients on a therapeutic vitamin K antagonist with a history of heparin induced thrombocytopenia (HIT);
  - patients with peri-prosthetic fracture, open fracture or bilateral fractures;
  - patients requiring an emergency surgery for another reason (e.g., subdural hematoma);
  - patients with acute myocardial infarction deemed to be clinically unstable, with a mechanical complication (i.e., acute papillary muscle rupture, ventricular septal defect), ST elevation myocardial infarction, or cardiogenic shock;
- ... and 2 more (see full listing online)
