

# RESTORE - Study of AGN1 LOEP to Prevent Secondary Hip Fractures

NCT04796350

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	AgNovos Healthcare, LLC
<b>Enrollment</b>	2,400 participants

## Key Eligibility Criteria

---

### Inclusion (20)

- Subject is a postmenopausal female at least 1-year post menses and at least 65 years of age.
- Subject presents with a low-energy index fragility hip fracture in one hip and will undergo surgical repair of the fractured hip.
- Subject has at least one of the following additional risk factors for a secondary hip fracture (as determined by subject or legally authorized representative (LAR) interview or medical record review):
- Documented falls assessment indicating subject is at moderate or high risk of falls
- Falls history (2 or more falls in the previous 12 months)

... and 15 more (see full listing online)

### Exclusion (24)

- Subject hospital admission is  $\geq$  24 hours from the time of the index hip fracture.
- Subject was dependent on the use of a wheelchair or was bedridden prior to the index hip fracture.
- Subject is currently enrolled in another clinical study.
- Subject has a history of hip surgery or previous hip fracture on the target unfractured hip contralateral to the index hip fracture.
- Subject has one or more new fractures in addition to the index hip fracture at admission that, in the opinion of the investigator, would further compromise patient mobility, rehabilitation, and/or recovery or subject has three or more new fractures in addition to the index hip fracture.

... and 19 more (see full listing online)
