

# Parent Intervention for Psychiatrically-Hospitalized Youth

NCT04797455

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	Stanford University
<b>Enrollment</b>	40 participants

## Key Eligibility Criteria

---

### Inclusion (4)

- youth is currently hospitalized on the Stanford unit at Mills Peninsula Medical Center, on the Inpatient Adolescent Psychiatry Unit, for suicidal ideation and/or a suicide attempt.
- youth is between the ages of 12-18 (18 year-old youth must still be in high school and living at home with parents for the duration of the study)
- at least one parent/guardian is willing to participate in the study intervention
- youth and parent speak English well enough to complete study treatment and assessments in English

### Exclusion (1)

- the youth or parent has a psychiatric or medical condition that would interfere with their ability to participate in study assessments and/or treatment (such as acute psychosis, neurological impairment, malnutrition due to anorexia)

## Locations (1 total)
