

Tradeoffs in Patient Decision Making About Rectal Cancer Treatment: Benefits Compared to Quality Of Life.

NCT04925154

Status	RECRUITING
Sponsor	Sir Mortimer B. Davis - Jewish General Hospital
Enrollment	192 participants

Plain Language Summary

This study is exploring how patients with rectal cancer and their doctors make treatment decisions, particularly the tradeoffs between different treatment approaches and quality of life considerations, using online questionnaires.

****You may be eligible if (Patient Group):****

- You have a new diagnosis of rectal cancer that is operable
- You are over 18 years old and capable of giving consent
- You can complete online questionnaires in French or English

****You may be eligible if (Physician Group):****

- You are a treating specialist for rectal cancer
- You can complete online questionnaires

****You may NOT be eligible if:****

- You cannot give your own consent
- Your cancer has spread to other organs (metastasis), or it is a recurring tumor (patient group)
- You cannot use an online platform to answer questionnaires
- You cannot communicate in French or English

Talk to your doctor to see if this trial is right for you.
