

# Clinical, Molecular and Imaging Biomarkers in Spinal and Bulbar Muscular Atrophy (SBMA)

NCT04944940

---

Status	RECRUITING
Sponsor	National Institute of Neurological Disorders and Stroke (NINDS)
Enrollment	70 participants

## Key Eligibility Criteria

---

### Inclusion (19)

- Some restrictions are placed on participation in the study because we aim to identify disease biomarkers specific to those with early to intermediate stages of disease who would be potential candidates for future therapeutic studies.
- In order to be eligible to participate in the SBMA cohort, an individual must meet all of the following criteria:
- Stated willingness to comply with all study procedures and availability for the duration of the study
- Male, above the age of 18 years
- Genetically confirmed SBMA

... and 14 more (see full listing online)

### Exclusion (22)

- SBMA is a disease that affects males and manifests in adulthood. Thus, woman and children are not included in this study. This study will not include individuals who lack consent capacity.
- An SBMA patient who meets any of the following criteria will be excluded from participation in this study:
- Contraindications to MRI such as a contraindicated non-removable metal device (i.e., pacemaker, defibrillator, insulin pump, metal clips, non-removable jewelry) or claustrophobia.
- Non ambulatory
- Use of androgen reducing agents within the past two years

... and 17 more (see full listing online)

## Locations (1 total)
