

Smoke Free SafeCare: Establishing a Smoke Free Home in CPS-involved Families

NCT05000632

Status	RECRUITING
Phase	Not Applicable
Sponsor	Georgia State University
Enrollment	268 participants

Key Eligibility Criteria

Inclusion (1)

- SafeCare providers in this study must 1) have completed the SafeCare workshop and passed field Certification (9 sessions of SafeCare delivered with fidelity according to the SafeCare Fidelity Checklist); 2) be employed at an accredited SafeCare agency in a target state based on Centers for Disease Control and Prevention (CDC) adult smoking data or prior SafeCare research documenting high smoking rates.

Exclusion (2)

- SafeCare providers will be excluded if they have planned for significant employment leave, resignation, or promotion during the study period.
- We will exclude those who 1) Report that no one smokes in the home; 2) Demonstrate an inability to understand their responsibilities as outlined in the consent form. This will be determined as the research staff verbally go through the consent form with the mothers. If mothers do not understand the consent form and subsequent procedures, they will be excluded.
