

Opioid/Benzodiazepine Polydrug Abuse: Aim 3

NCT05006079

Status	RECRUITING
Phase	Phase 2
Sponsor	Wayne State University
Enrollment	24 participants

Key Eligibility Criteria

Inclusion (3)

- must self-report past 10-year experience taking opioid and sedative drugs (for therapeutic or non-therapeutic reasons), but not necessarily at the same time. As an alternative to the sedative drug exposure requirement, participants must have used alcohol on at least 3 separate days during the past month. Participants may have current mild- or moderate-severity Opioid Use Disorder or current mild- or moderate-severity Sedative Use Disorder;
- must not be seeking treatment for their substance use problems;
- must be in current good overall health

Exclusion (13)

- meet DSM-5 criteria for current psychosis, bipolar disorder, or severe depression (i.e. severe psychiatric disorder);
- meet DSM-5 criteria for severe substance use disorder for any substance (e.g. Sedative, Opioid, Alcohol);
- past-month benzodiazepine or opioid prescription (which would suggest daily use, tolerance, or withdrawal upon cessation);
- report of past-year any-drug overdose or suicide attempt/ideation;
- exhibit cognitive impairment (IQ < 80 on the Shipley Institute of Living Scale);
- ... and 8 more (see full listing online)
