

Melatonin for Prevention of Kidney Injury

NCT05084196

Status	RECRUITING
Phase	Phase 3
Sponsor	Rutgers, The State University of New Jersey
Enrollment	300 participants

Key Eligibility Criteria

Inclusion (2)

- Aged 18 to 75 years
- Currently prescribed vancomycin with the presumption that therapy will be continued for at least 3 days based on a review of subject status. Because of the critical nature of starting empiric broad-spectrum antibiotics, we will allow one dose of the antibiotic combination before consent and enrollment. This strategy is necessary for the ethical conduct of the study.

Exclusion (10)

- Estimated creatinine clearance < 30 mL/min
- Liver impairment (liver enzymes > 3 times upper limit)
- Any history of allergy or contraindication to melatonin
- Pregnancy or breastfeeding
- Autoimmune disease

... and 5 more (see full listing online)
