

Connecting Families

NCT05091957

Status	RECRUITING
Phase	Not Applicable
Sponsor	Queen's University
Enrollment	80 participants

Key Eligibility Criteria

Inclusion (3)

- Parents of children (younger than 3 years) attending a regularly scheduled primary care visit.
- Parents respond affirmatively to the question "Do you ever have difficulty making ends meet at the end of the month?"
- Informed parental consent. Only one child will be enrolled per family. For families with more than one child, we will enroll the youngest eligible child, since literature suggests that impact of reducing family stress may be greater at younger ages; for multiple births, one child will be randomly selected for inclusion.

Exclusion (4)

- Parents without legal status in Canada, as they are not eligible for many Canadian social programs.
- Families who are receiving system navigation support, such as from a social worker or public health nurse, or who have received system navigation support within one year prior to enrolment.
- Child with a previously diagnosed developmental disorder, genetic, chromosomal or syndromic condition.
- Child born prematurely (gestational age less than 32 weeks).
