

Randomized Trial Comparing Immediate vs. Deferred Surgery for Symptomatic ERM

NCT05145491

Status	RECRUITING
Phase	Not Applicable
Sponsor	Jaeb Center for Health Research
Enrollment	400 participants

Key Eligibility Criteria

Inclusion (10)

- Age ≥ 45 years
- E-ETDRS visual acuity 20/40 or better (e69 letters)
- o ERM must be thought to be the primary cause of vision loss
- ERM meeting the following criteria, according to the investigator
- ERM is not secondary to another condition

... and 5 more (see full listing online)

Exclusion (17)

- History of retinal vascular disease
- History of vitreous hemorrhage if vitreous hemorrhage is thought to have caused the ERM
- o History of vitreous hemorrhage is permitted provided the vitreous hemorrhage did not cause the ERM in the investigator's opinion
- History of inflammatory disease unless mild and completely resolved at least one year prior to randomization
- History of diabetic macular edema (DME), retinal vein occlusion (RVO), or uveitis (except mild uveitis that resolved >1 year prior to randomization)

... and 12 more (see full listing online)
