

National Database on Primary Biliary Cholangitis

NCT05151809

Status	RECRUITING
Sponsor	University of Milano Bicocca
Enrollment	6,000 participants

Key Eligibility Criteria

Inclusion (4)

- All PBC patients living in Italy and aged at least 18 years can be included in the database. According to well-established criteria, PBC is diagnosed in subjects who fulfill two of the three of following criteria:
- elevated alkaline phosphatase and /or GGT;
- positive anti-mitochondrial autoantibodies (titer e 1:40) or PBC-specific antinuclear antibodies (gp-210 and sp100);
- characteristic histological features of florid bile ducts lesions and granulomatous lesion.

Exclusion (1)

- The patient has explicitly declared his/her unwillingness to participate to the study
